Advice to Doctor

Treat symptomatically. Show this SDS to the medical practitioner.

5. FIRE-FIGHTING MEASURES**Suitable Extinguishing Media**

Combustible liquid. Avoid heat and all ignition sources. Use dry chemical, Carbon dioxide (CO₂), alcohol-resistant foam or water spray for extinction - Do not use water jets; a solid water stream may scatter and spread fire.

Hazards from Combustion Products

Closed containers exposed to high temperatures, such as fire conditions may rupture. Vapours may form explosive mixtures with air. Use water sprays to cool fire exposed surfaces and any adjacent storage vessels. Shut of source of product if safe to do so. Remove

sources of re-ignition. Wear a breathing apparatus when attending fire hazard.

Special Protective Equipment for fire fighters

Fire fighters to wear full body protective clothing with breathing apparatus. Deluge with water to cool containers. Evacuate area move upwind of fire.

6. ACCIDENTAL RELEASE MEASURES

Spills & Disposal

Ensure adequate ventilation. Slippery when spilt. Contain spill with sand or earth. Gather up absorbent for disposal according to regulations. Avoid concentrated spillage from entering drains or watercourse. Do not allow to enter storm water drains, or water courses. Remove for disposal in accordance with local waste management. Use suitable containers for disposal.

Personal Protection

Refer to Section 8 of this SDS.

Environmental Precautions

Dispose of in accordance with local, state, and federal regulations.

7. HANDLING AND STORAGE

Precautions for Safe Handling

Store in cool well ventilated area away from heat and ignition sources. Containers should always be kept closed in storage and properly labelled. Avoid contact with oxidising agents and mineral acids. Store only in original or approved containers. Harmful or fatal if swallowed! Avoid contact with eyes and skin. Avoid breathing vapors. Do not flame, cut, braze weld or melt empty containers. Keep the product away from heat, open flame, and other sources of ignition.

Storage Regulations

Refer Australian Standard AS 1940-2004 "The storage and handling of flammable and combustible liquids".

Additional information on precautions for use

Always use clean and dry equipment to dispense the product. Dispensers should be cleaned before and after use. All dispensers should be washed out after use.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational exposure limit values

No value assigned for this specific material by the National Occupational Health and Safety Commission. However, for the hydrocarbon constituent: TWA = 184 ppm (1200 mg/m³)

Appropriate Engineering Controls

Keep away from sources of ignition. Take precautionary measures against static discharges. Provide sufficient ventilation to control exposure levels below the exposure standards. Use local exhaust ventilation at sources of air contamination such as open process equipment. Dangerous concentrations may exist in areas with poor ventilation such as confined spaces.

Personal Protective Equipment

Wear chemical goggles or face shield. Respiratory protection should be used if there is a risk of exposure to high vapour concentrations being generated from usage. Respirators should comply with AS1716 or an equivalent approved by a state/territory authority. Wear protective clothing as necessary to avoid skin contact.
